This is to Certify that

Joseph J. Bartlett

has creditably completed the
U. S. Maritime Service Instruction Course in

Internal Combustion Engines

with the grade of 90 per cent

Awarded this 18th day of June 1940

K. D. Baley
Registrar

J. Hottel
Director

W. N. Derby
Chief Maritime Service

ESTABLISHMENT OF EXTENSION COURSES

Extension courses are offered to personnel of the American Merchant Marine by the United States Maritime Commission in accordance with a statute which provides:

The Commission is hereby authorized to prescribe, conduct, and supervise such extension and correspondence courses as it may deem necessary to supplement other training facilities, and to make such courses available, under such rules and regulations and upon such terms as it may prescribe, to the licensed and unlicensed personnel of the merchant marine, and to cadets and cadet officers who shall make application therefor.

WHO IS ELIGIBLE

The extension courses are offered to seamen of oceangoing and Great Lakes vessels who are active in their calling. A minimum of 12 months' service on seagoing or Great Lakes vessels over 500 gross tons during the 3 years immediately preceding the date of application is required. Both licensed and unlicensed seamen may apply for enrollment. In order to determine that applicants have the necessary educational qualifications to undertake the courses for which they apply, each application must be endorsed by the master, chief engineer, or chief purser of a vessel on which the applicant has served. Enrollees who fail to submit a reasonable number of lessons for review or who fail to continue their calling as seamen may be disenrolled.

CADET OFFICERS AND CADETS

Cadet officers and cadets should apply for extension courses to the Supervisor of Cadet Training. Required courses are prescribed by the regulations for cadet officers and cadets.

COURSES AVAILABLE

The Maritime Commission has arranged for the Coast Guard Institute at New London, Conn., to administer the extension courses offered to seamen. These extension courses will be known as Maritime Service Instruction Courses. They will be based largely upon the self-aid instruction texts prepared especially for the United States Maritime Service. The examinations submitted by students will be reviewed and graded by Coast Guard personnel who have qualified for such duty according to the standards approved by educational

institutions maintaining similar facilities for nonresident study. An appropriate diploma will be issued to each student completing a course satisfactorily.

COST TO STUDENTS

The only cost to students will be the payment of a registration fee for each course selected. Each application for enrollment must be accompanied by a money order covering the entire registration fee (for the course desired as indicated below). This money order should be made payable to the **TREASURER OF THE UNITED STATES**. Instruction texts as issued become the property of the student. No refund will be made on account of the failure of the student to complete a course, but all texts will be issued upon request. The cost of administration and salaries of instructors will be borne by the Maritime Commission, and students will pay only a registration fee.

HOW TO APPLY

An application should be submitted on the form provided by the Maritime Commission. Forms may be obtained in the principal seaports at the offices of the Maritime Commission, Coast Guard, and shipping commissioners. The applicant should fill out the form, have it endorsed by the master, chief engineer, or chief purser of a vessel on which he has served, and forward it to the United States Maritime Service, Washington, D. C.
